

PT. TRIAS SENTOSA, TBK ENVIRONMENTAL POLICY & OBJECTIVE

ENVIRONMENTAL POLICY

PT. Trias Sentosa, Tbk. aims at ensuring its sustainable future, therefore it has to have a sound environmental management in its operation **including continuous improvement** and furthermore it also aims at working toward the circular economy.

The above stated intention will be achieved by assuring compliance to regulation / legal requirements, managing / reducing waste, conserving natural resources, promoting the internal or external recycling activities and developing market as well as products that support sustainable environment.

To achieve these, PT Trias Sentosa, Tbk. will:

- **identify and manage the significant environmental aspects throughout the manufacturing operation.**
- monitor and control the environmental performances comprises of proper management of water, air/noise pollution, the handling of manufacturing waste including hazardous ones and reporting periodically to authorities as required.
- **ensure the use of appropriate energy source and use the renewable ones whenever possible whilst keep an eye on the green-house gases emission.**
- initiate the activities for pollution prevention and reduction, wherever and whenever possible apply more stringent criteria.
- set up targets of manufacturing waste reduction program for both non-hazardous and hazardous as well as of conservation of natural resources, water and energy gas, fuel and electricity.
- carry on the manufacturing recycling activities by optimizing the use of in-house recycle materials in production process or when unfit it is to be sold to third party for other usage.
- work with business partners and other concerned organizations to launch an initiative to make use of the external waste from market to be reused, recycled and or converted into materials that can be utilized for other purpose.
- evolve in the development of market as well as products with business partners, third parties that have relevant expertise or research institution that support a sustainable environment such as **eco-friendly** plastic.
- remain alert and responsive to the developing issues, knowledge and public concerns.

PT. Trias Sentosa, Tbk. will communicate actively in order to:

- provide whatever information and advice that is necessary on the safe use and disposal of our products.
- ensure that employees are aware of the Company's environmental policy and motivated to apply it; are aware of their own responsibilities and are given the support and training necessary to fulfill them.

ENVIRONMENTAL OBJECTIVE

Environmental Objectives are established at relevant functions and levels within the organization, measurable and consistent with the Environmental Policy.

Ensuring the updating of the significant environmental aspects and the implication of its monitoring and control system.

Monitoring the progress of the implementation of the policy is done monthly includes :

- Periodic monitoring of the environmental parameters as required and reporting to authorized body, local department of environment and hygiene, that is responsible to oversee the factory performance related to management of water and air pollution as well as the handling of hazardous waste.
- Monitor the hazardous waste including the handling, the amount and the cost involved and initiate the reduction.
- **Monitor and properly handled the waste to minimize the possible pollution.**
- **Monitoring of energy usage as part of the energy reduction initiatives, including to keep an eye on the green-house gases emission.**
- The application of new permit for new activities and monitoring the existing permit and apply for the renewal for the expired one.
- The progress of projects with business partner on waste recovery initiative.
- The updating of the new rules and regulation that is issued and review its implication to the current operation.
